## TASTY DAZE

Tasty Daze was formed in 2010 by five guys who wanted to play their music in front of a larger audience. In June 2014 the hardrockers won the competition Popturnén arranged by Radio X3M and FSU. With their energetic music and adrenaline filled stage performance they wish to take all hardrockers to new dimensions.

## KAOS KREW

Kaos Krew from Pietarsaari, Finland has been around for about 10 years.

The band plays "crossover metal" based on heavy riffs with the addition of synthesizers and loops from the industrial scene. You can hear influences from the early 70:s to present day within the music.

The band has released 3 CD albums, a music video and a live concert video throughout the years. The lineup has changed over the years and the latest lineup is as follows.

## IN DIVINIA

In Divinia is a symphonic/melodic metal band with female vocals in front, spiced with symphonic elements and harsh vocals. The group started as a Nightwish cover band in 2006, named Silent Devotion. After a few years, and about 20 gigs later, the band didn't only want to playing covers, thus making of own songs began.

In 2010 the band recorded a promotion demo, Before the War, which made the musicians even more eager to make a full-length album. The debut album "Unthawed" was completed and digitally released in 2014. The band has gone through a few lineup changes lately and is working with new material.

The Concerts In Divinia offer is an experience of a mighty sound with heavy guitars and fast drums mixed with heavenly vocals.

## NIGHON

Nighon is a symphonic shock metal band based in Pietarsaari, Finland. Formed in 2008, active service since 2009. The band portrays unglorified stories from war and other crimes. The band does not support fascism or any suppressing ideologies in any way. The band's clothing is inspired by German, American and Soviet army personnel. The band keep a neutral approach towards religions as long as no one gets hurt. The band's music is greatly inspired by cinematic music and extreme forms of metal. The result is a unique and aggressive sound which is to be developed further and further, blending darkness with light.
